- EXHAUST: air renovation
- Airswing: automatic air distribution
- 14 temperature levels
- Modern and compact design
- Operation: remote and manual

ECOLIFE

The Ecolife unit offers the perfect combination of cooling capacity, air movement, humidity and noise level during operation.

At Carrier we worry about your health and about creating real comfort. That is why our window units have the EXHAUST and DRY function that renovates polluted air and humidity in the room.

Carrier window units are developed with high standards of energy efficiency, which translates into lower payments of energy consumption.

Anti-corrosion Protection: Blue Infinitem creates a barrier between the aluminum and the copper tube, thus preventing corrosion. It lengthens the life of the unit up to three times compared to the normal aluminum blades. In addition, it can be used in coastal and urban surroundings.
